**NEOFLUX'S INTRODUCES
NF SERIES – THE METAL PUMPS**

Neoflux is proud to announce the availability of the new *Neo-Tune* Design Metal Series Pump (*nf Series*). The new *nf Series* pump incorporates an innovative Air-Distribution System (ADS) first time in Indian Market. This Air Distribution Management System optimizes the new *Neo-Tune* ADS to specific operating conditions. With the turn of an integrated control knob, the pump user can select the desired efficiency point & flow rate that best suites the application.

The results are higher performance, lower operational costs & performance flexibility that goes far beyond what was considered the industry standards.

Example: The *Neo-Tune* Air-Distribution System Design has shown air consumption savings as high as 61% over the competition in certain applications.

The *Neo-Tune* ADS is groundable & suitable for the harshest environments. The pump is available with Aluminum or Stainless Steel wetted materials and all elastomeric options to meet customer requirements. Consistent with other Series pumps, the bolted configuration ensures product containment.

The Neo-Tune design is guaranteed to push AODDP world to new performance heights. It will out pace, out match & out perform the competition. ***Its time to contrive the flow you want!!!***

Features & Benefits:

- Flow Rate upto 1009 LPM (267 GPM) (60.5 M³ / Hour)
- Highest Output in AODDP Industry. Greater Discharge per CFM input
- Maximum Pressure = 8.6 BAR (125 PSIG)
- Aluminum / Plastic *Neo-Tune* Lube Free Air Distribution System
- SS-304 / Die-Cast Aluminum Bolted Configuration For Total Product Containment
- Options of *Neo-Flex* (Rubber) or *Neo-Tef* (PTFE) Diaphragm Technology
