**NEOFLUX'S INTRODUCES
NFP SERIES – THE PLASTIC PUMPS**

Neoflux is proud to announce the availability of the new *Neo-Flo* Design Plastic Series Pump (*nfp Series*). The new *nfp Series* pump are manufactured with wetted path of un-pigmented virgin Polypropylene & incorporates an innovative Air-Distribution System (ADS) first time in Indian Market. This Air Distribution Management System optimizes the new *Neo-Flo* ADS to specific operating conditions.

The results are higher performance, lower operational costs & performance flexibility that goes far beyond what was considered the industry standards.

Example: The *Neo-Flo* Air-Distribution System Design has shown air consumption savings as high as 48% over the competition in certain applications.

The *Neo-Flo* ADS is groundable & suitable for the harshest environments. The pump is available with *Un-Pigmented Polypropylene* wetted material and all PTFE elastomeric options to meet customer requirements. Consistent with other Series pumps, the bolted configuration ensures product containment.

The *Neo-Flo* design is guaranteed to push AODDP world to new performance heights. It will out pace, out match & out perform the competition. ***Its time to contrive the flow you want!!!***

NFP 25 - Features & Benefits:

- Flow Rate upto 210 LPM (55 GPM) (12.6 M³ / Hour)
- High Suction Lift Capability – 9.0 Meter (29.5 ft.)
- Lowest Parts & Highest Output in AODDP Industry. Greater Discharge per CFM input
- Maximum Pressure = 8.6 BAR (125 PSIG)
- Light Weight Polypropylene with straight re-designed liquid flow path. Ease of mobility
- *Neo-Flo* Lube Free / Stall-Free / non-icing ADS
- Bolted Configuration For Total Product Containment
- Explosion Free
- Whisper Quiet Operation. Typical Noise Level – 66dB. OSHA Compliant
- Options of *Neo-Flex* (Rubber) or *Neo-Tef* (PTFE) Diaphragm Technology
